

CP100

MULTIZONE WALK THROUGH GATE

Features

High precision Multi Zones allow more accurate detection.
The indicator light automatically shows the interfering signal from the environment.
Each zone can be independently set with 0-99 sensitivity range.
System is sensitive enough to detect even clip-sized metal.
Intelligent automatic recording of alarm times and number of people passed.
With the unique infrared setting, it has strong omission proof and anti-interfering capacity.
Cipher Protection prevents malicious config changes by unauthorized people.
It is harmless to pacemaker, pregnant woman and magnetic storage media.
It is equipped with LED indicator lights as high as human body at both sides of the gatepost.
Scan result is clear to understand at a glance.
Gate is slip proof, waterproof and damp proof.
Passage dimensions: 2000mm x750mm x530mm
External dimensions: 2200mmx870mm x530mm
Power supply: AC 220V
Power: <30 VA
Working environment: -20 – 55°C
Net weight: 75Kg

Accurate Detection

Capable of detecting a wide range of threat objects composed of magnetic, non-magnetic metals and mixed alloys, Quick, accurate analysis of all parts of the body of people in transit, from the shoe level to the crossbar
The CP100 is a high performance walk-through Multi-Zone Metal Detector which meets all International Security Standards. A “height on person” display actually indicates, by means of illuminated LED’s, the position of the weapon on the person.
The CP100 allows a high level of discrimination between significant metal masses, such as the weapons which are to be detected, and personal metal effects. Exceptional immunity to environmental interferences makes it easy to use even when electrical noise is encountered. The detection capability is independent of the transit speed.
